P R E F A C E

The Reconstruction and Rehabilitation Programme implementation took off in April 2006. By that time, ERRA had already gained momentum in the planning and strategy development and started devolving responsibilities with due focus on building capacity of its affiliates, SERRA/PERRA and DRUs.

The enormity, complexity and diversity of reconstruction and rehabilitation programme afforded unparalleled experiences that opened new avenues for learning to people within the organization, as well as to stakeholders, development practitioners, planners and managers, academic institutions and international community. One such avenue led to the development of District Profiles of the nine earthquake affected districts.

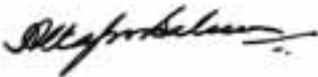

The impediments faced in collecting accurate data for damage assessment of the earthquake and for planning reconstruction strategies was a sufficient indicator for ERRA to address the deficiency timely and pragmatically to ensure that such a situation would not be repeated in the future.

Therefore, ERRA, together with its affiliates SERRA/PERRA and DRUs, initiated compilation of available district specific data/information on relevant socio-economic and physical indicators in the form of District Profile to serve as a baseline and a reference point for planning and monitoring progress of work.

The first District Profile has been completed in July 2007. It will be updated regularly with information received from the field through MIS reporting mechanism on the progress of each programme sector with necessary analysis.

The document, it is hoped, will become a useful source of information on district's progressive development under the reconstruction and rehabilitation programme.

I avail this opportunity to thank ERRA team and its affiliates for dedicating their time and efforts to prepare the document, and our development partners for their encouragement and support in the process.

Altaf M. Saleem
Chairman

ACKNOWLEDGEMENTS

The Earthquake Reconstruction and Rehabilitation Authority (ERRA) is grateful to the Government of Azad Jammu and Kashmir (AJK) and the Government of the North West Frontier Province (NWFP), State/Provincial Reconstruction and Rehabilitation Agencies (SERRA/PERRA), District Reconstruction Units (DRUs) and line departments for their cooperation and practical assistance in the collection, verification and consolidation of information for the District Profile.

ERRA is also thankful to WFP and NESPAK for jointly providing useful maps for the districts, which are part of the profile.

Contributions and support by various Wings and Cells within ERRA to Knowledge Management Team in the process, is duly acknowledged.

Finally, it was a collective effort by the larger ERRA family that had received tremendous support from its partners in development, the G-7 group of donors. ERRA fully acknowledges their support.

Lt. Gen Nadeem Ahmed
Deputy Chairman
ERRA

Khadija Khan
Chief

EXECUTIVE SUMMARY

District Shangla, like Kohistan, is one of the less developed districts of the country. Therefore, the Government of Pakistan has decided to rebuild and further develop the destroyed/damaged infrastructure, using the opportunity of reconstruction and rehabilitation after the 2005 earthquake.

The information available in the District Census Report of 1998 needs to be updated for the purpose of better planning; however, Earthquake Reconstruction and Rehabilitation Authority (ERRA) with the assistance of its affiliates Provincial Reconstruction and Rehabilitation Agency (PERRA) and the District Reconstruction Units (DRUs) collected relevant statistics from various sources including the Preliminary Damage Assessment to have a sense of existing situation.

District Shangla is a newly born district. It is spread over an area of 1586 sq.km. with a population of 512,212. The Population growth rate is 3.27% and average household size is 8 persons per family.

The socio-economic indicators of Shangla are comparatively low. For example the literacy rate is 14.5%; for male 25% and for female 3.7%. Primary school enrolment rate is 14.2 %.

There are 64391 housing units, all rural, with 82.9% ownership. Only 12.7% population has access to drinking water inside the house.

The meager livelihood of Shangla has been affected by the earthquake. The reconstruction and rehabilitation programme is going to focus on restoring and rebuilding the irrigation system, agriculture extension, livestock and restoration of roads.

As for the damages to social infrastructure and reconstruction plan, besides reconstructing 210 damaged schools, 155 new primary and 5 middle schools are to be built. At the same time 34 health facilities are included in the plan.

Regarding reconstruction or repair of water and sanitation facilities, transport infrastructure, telecommunication and power network as well as the government buildings, the respective programmes ensure that every facility is being built better than before. For this purpose, the District Government has already prepared a work plan for the period of three years 2007-2009.

Chapter 1

Introduction¹

The history of District Shangla is not very old. It remained a part of District Swat for several years and was declared a separate district by the Government in 1995. The Buner District was also a part of the Swat dynasty selected as the first state regime in 1924. Then ruler of Swat included many other areas namely, Kana, Ghurband, Lilowni, Besham, Chakesar, Martang and Puran (present areas of Shangla) in his dynasty in 1926. In 1969 it was dedicated to the State of Swat and got merged in NWFP as a district. Shangla-Top, separates District Shangla from District Swat.

1.1 Landscape and Physical Features of the Area

District Shangla, is surrounded by District Battagram in the east, District Swat in the west, District Kohistan in the north and District Buner in the south. It is spread over an area of 1586 sq km with 36% of cultivated and 64% of non-cultivated area including 32% of forest area.

The topography of the district is dominated by high mountains and narrow valleys in western extremities of Himalaya. The general elevation of the district is 2000 to 3500 meter above the sea level. The highest point in the district is Kuz Ganshal which is 3440 meter above the sea level.

The climate here in winter season remains extremely cold in upper part of Shangla and moderate in lower part. Similarly in summer, the lower part remains hot while upper part of Shangla remains moderate. The temperature in summer remains between 17⁰c to 30⁰c while in winter the temperature ranges from 0⁰c to 20⁰c. Farming is major income generating activity which largely depends upon rain water and only 2% of the cultivated area depends on irrigation channels. Popular crops are wheat, maize, and vegetables which are mostly consumed within the district.

There is a beautiful river that comes from glaciers dividing Shangla into two parts and falls into the Indus River at Besham. Natural resources like precious gem stones, coal and forest play an important role in income generating activities for the local population.

1.2 Industry, Trade and Commerce

Most of the people of the district depend upon agriculture sector. In spite of a high fertile land, the size of the land holdings is very small. Desi Ghee (animal fat) and honey are also the major products. The main fruits in the district are apple, walnut, plum, pear, Amlook, mango, guava and apricot. Mushrooms of export quality are also cultivated. The wool from sheep is consumed locally in manufacturing of blankets and other woolen items.

¹ 1998 District Census Report

1.3 The People

Shangla is ethnically composed of many prominent tribes which include Afghan, Gujar/Ajar, Syed, Qureshi and Mian. NWFP is also known as the 'land of hospitality' and the people of District Shangla seem to be the true picture of this title. They are famous for their great hospitality.

1.4 Roads

The present road from Mingora to Besham via Shangla-Top is the only link road with other districts of NWFP, which was built at the time of Waali-e-Swat. Many schools, hospitals and the Degree College at Alpuri were also built during that era. At present public transport system is very poor and outdated.

1.5 Telecommunication

PTCL provides the landline telephonic services in Shangla. There is no cellular phone services except at Shangla-top (the upper most part), Dandai, Maira and in some lower parts of Shangla. The facility of internet facility is also available in few parts of the district but it is limited and of poor quality.

1.6 Power

PESCO provides services of electricity to the people of the district but the power breakdowns are very frequent. Low voltage remains the major problem for the users which creates many problems. In some areas, small hydro-power generators are used for electricity generation.

1.7 Social Protection

One of the most important but negligible sectors of the society is social protection. The ratio of vulnerable people is very high in district Shangla. The ratio of disabled population (one of the vulnerable groups) is very high in this region. The 1998 census shows that 1.9% of the total population of Shangla is disabled, out of which 60% are male and 40% are female 36% of the total disabled population is affected by multiple disabilities, deaf/mute, mentally retarded, blind and insane representing 10.9%, 8.2%, 7.7%, and 6.5% respectively.

1.8 Administration

The administrative head of the district is District Nazim. Moreover, District Government is administered by the District Coordination Officer along with other heads of the line departments.

1.9 Important Places

Tourists of the country and foreigners come to see the beautiful valleys and water falls of the hills. The lush green attractively carpeted fields and slopes in the background of snow covered mountains present a great charming view of District Shangla. There are also some well-known places in the district like Shangla-Top, Takht Barakhan Lake and Puran Lake.

Chapter 2

Pre Earthquake Socio-Economic and Physical Indicators - Baseline District Census Report 1998 with Updates on Selected Indicators

2.1 Overview

The population of the district is now 512,212 as against to 434,536 shown in the District Census Report of 1998 which was 2.5% of the total population of the province. The population growth rate is 3.27% with an average household size of 8 persons per family. According to 1998 District Census Report, the percentage of male and female population is 51.496% and 48.503% respectively, while male to female sex ratio is 106. The literacy rate is around 14.5%. The disabled persons constituted 1.9% of the total population of the district.

According to District Census Report 1998, 60.9% of the total population above the age of 18 years holds National Identity Cards. Male % is higher than female which is 75.6 % and 46.2% respectively.

The current estimate of the total number of households is 64,391 while the 1998 Census Report shows the figure as 53,529. A rough estimate shows that more than 70% housing units are made of stone, unbaked bricks with wooden roofs, while 30% of housing units are made of baked bricks with RCC roofs.

2.2 Sector-Wise Specific Information

The information provided in the following tables is basically taken from the Finance and Planning department, the 1998 Census Report and reports from the the respective line departments of District Shangla.

Statement for Prior Clarification

The Third Chapter comprises of statistics on the Extent of Damages and Reconstruction Plans which have been taken from the Preliminary Damage and Need Assessment Report by ADB/WB and ERRRA's Sectoral Strategy Documents. Moreover, figures of 2nd assessment carried out in Housing Sector have been incorporated. The data regarding power sector has been taken from PESCO. The exercise for specific need-base re-assessments and reconciliation of project level planning is underway. Any new projects identified and agreed upon by ERRRA will be incorporated in the strategies in due course of time.

Chapter 3

Extent of Damages due to Earthquake October 2005 And Sector-Wise/Year-Wise Reconstruction Plan

The effects of Earthquake of October 8, 2005 are also recorded in the Shangla District. According to an estimate, 444 people lost their lives and 1925 got injured. Overall 34% households were affected in the district. To provide support to the affected population, Rs 658.770 million were disbursed as a payment for compensation.

In order to assess sector wise damages and plan for reconstruction of each sector following details are given.

3.1 Housing Sector

i. Extent of Damages

In district Shangla like other sectors housing sector was badly damaged in the earthquake. The details of damages are given in the following table.

Table 8					
Extent of Damages to Housing Sector					
Destroyed		Damaged		Negligible Damage	
No.	%	No.	%	No.	%
14104	53.1	9623	36.27	2804	10.56
Source: Internal Sources of ERRA					

ii. Reconstruction Plan

Policy on Housing Reconstruction

The principles for housing reconstruction have been identified as the follows:

- ? Establish building standards and designs that are earthquake resistant.
- ? Rebuild in situ. Minimum population relocation should take place.
- ? Rebuilding will be owner-driven, but assisted and inspected by the Government through partner organizations. Owners need to be in charge of the reconstruction of their houses and understand earthquake resistant building techniques.
- ? Familiar building methods and easily accessible materials will be used in rebuilding. Earthquake resistant elements need to be introduced in the traditional and currently used building techniques.
- ? Relocate settlements only when necessary, from sites that are hazardous
- ? A uniform financial assistance package for rebuilding will be disbursed to all affected population, which will not be compensation-based.
- ? Coordination is necessary to ensure full spatial coverage and avoid duplication of service provision.

As per ERRRA's housing reconstruction strategy, plan for reconstruction of fully and partially damaged houses were made. A total of 26531 houses have been reported damaged for which Rs 582.825 million rupees have been paid to 23313 affected house owners.

3.2 Livelihood Sector

i Extent of Damages

The affected areas have no industrial base and mostly people are employed in agriculture and related services. The foreign and local remittances are also a source of income. The earthquake has badly affected the income generating capacity of many households through deaths and disabilities. Further the geological fragility, high population growth, uncontrolled logging in the forest area have exacerbated the vulnerability of the effected area.

Table - 9			
Employment Losses (NWFP)			
Sectors	Pre-Earthquake	%	Employment Loss

ii Reconstruction Plan

a. Livelihood (Cash Grants) Programme

The livelihood programme had one immediate intervention under the subject of Livelihood (Cash Grants) Programme that focused on provision of cash grants to vulnerable families, selected on the basis of eligibility criteria, primarily to meet their immediate food and non-food needs over a period of six months. The programme is being implemented progressively in all the affected districts between September 2006 and June 2007. A fixed amount of Rs 3000 per month is provided to families fulfilling the criteria.

An extension of the programme for another six months has been further implemented to cover only the most vulnerable families in the affected districts.

b. Livelihood Core Programme

The livelihood core programme strategy focuses on rehabilitation of primary industry, small business and employment. The strategy is based on a participatory approach whereby villages/communities will be assisted in preparing Community Livelihood Rehabilitation Plans which shall be a set of prioritized needs. Once the plan is agreed/approved, the village shall be eligible for Rs. 750,000 grant to address the identified needs with the assistance of concerned government technical departments. The indicative eligible investments for this grant are livestock production, fruit and vegetable production, replacement and repair of damaged traditional irrigation systems, restoration of small access roads, rehabilitation of terraces, and rehabilitation of emergency employment centers and provision of micro finance facilities. The DRU based Livelihood Coordinators shall be the main focal persons to lead the planning and implementation process. A Livelihood Coordination Forum, consisting of all line departments and NGOs involved in livelihood related activities, shall be the main coordination and approval forum.

In district Shangla, for reconstruction and rehabilitation of livestock and agriculture a budget is prepared and mentioned in the table below. Rest of the sectors of livelihood generation programmes are still in process to complete.

Proposed Budget of Live Stock / Agriculture Sector		
Year	Estimated Cost in Rs Million	Unit
2006-07	2.51	6
2007-08	6	3
Total	8.51	9

Source: Agriculture & Livestock Department of District Shangla 2006-07

3.3 Education Sector

i Extent of Damage

In district Shangla there were 555 educational institutions identified in which 225 were completely damaged and 330 were partially damaged in the earthquake. School-going children and teachers have also lost their lives in the earthquake. The details of damages are given below.

Table - 13																	
Extent of Damages to Education Sector																	
Fully Damaged/Schemes/ Scope of Work																	
GPS		GGPS		GMS		GGMS		GHS		GGHS		GHSS		Collages		Total	
CD	PD	CD	PD	CD	PD	CD	PD	CD	PD	CD	PD	CD	PD	CD	PD	CD	PD

Taxila. Therefore they are excluded from Annual work plans. And one Degree College Puran has been pledged by Note: Two schools, GGPS Chagum Dandai & GPS Maidan Maira have also been pledged by Christian Hospital Govt of Brunei therefore, it has also been excluded from annual work plans.																	
Source: Education Department of District Shangla 2006-07																	

ii. Reconstruction plan

To reconstruct the damages caused by the earthquake, as per ERRA's strategy, a plan has been developed for District Shangla with an amount of Rs 3015.311 million has been allocated for 555 units of which one unit namely Govt. Degree College Puran has been pledged by Government of Brunai Daru-Salam. Two other units namely GPS Maidan Maira and GPS Chagum Dandai have been pledged by Christian Hospital Taxila with a cost of Rs 11.049 million for each school. However GPS Maidan Maira and Chagum Dandai have also been included in Annual Work Plan. Year-wise allocation of budget for the same is given in table 14.

Table 14		
Year-Wise Proposed Budget of Education Sector

2008-09	330	330
Total	3015.311	552+3 pledge
Source: Education Department of District Shangla 2006-07		

3.4 Health Sector

i. Extent of Damage

In health sector 30 health units have been damaged. The numbers of completely and partially damaged units are 6 and 24 respectively. However 4 new health units have also been included for construction along with 30 damage units.

Extent of Damages to Health Sector																	
Scope of Work

Source: Health Department of District Shangla 2006-07																	

ii. Reconstruction plan

According to the ERRA's Health Strategy, the reconstruction of 34 health facilities has been finalized with an estimated cost of Rs. 554.349 million. In 2006-07 a total of 18 units will be reconstructed with a cost of Rs 532.649 million and in 2007-08 a total of 16 units will be reconstructed with an estimated cost Rs. 21.7 million.

Year-Wise Proposed Budget for Health Sector		
Year	Estimated Cost in Rs Million	Unit
2006-07	532.649	18
2007-08	21.7	16
Total	554.349	34

3.5 Water and Sanitation Sector

i. Extent of Damage

In district Shangla 44.1% people had access to safe drinking water and 39.2% population had sanitation facilities but the earthquake further deteriorated the situation. The damaged water supply schemes and sanitation schemes were 414 and 65 respectively. Details of damaged schemes are given in the table below.

Extent of Damages and Reconstruction of Water Supply & Sanitation Schemes												
Scope of Work												
Sector	W&S (PHE)			TMA Puran			TMA Alpurai			Total		
	CD	PD	New	CD	PD	New	CD	PD	New	CD	PD	New

*Pledge by Donors

ii. Reconstruction plan

For the reconstruction of damaged government buildings in District Shangla including 10 new buildings, a proposed budget of total Rs. 374.58 /- million has been prepared. Year-wise details are given as under:

Proposed Budget of Building Sector		
Year	Estimated Cost in Rs. Million	Unit
2006-07	90.745	42
2007-08	283.835	07
Total	374.58	49

Source: District government of Shangla 2006-07

3.7 Power Sector

PESCO is responsible for electricity distribution in all the affected districts of NWFP (Abbottabad, Mansehra, Battagram, Kohistan and Shangla). It manages both the STG and distribution (11 kv and 0.44 kv) networks, provides consumer connections, undertakes collection of billings and other operational matters. The electricity was restored to the affected areas including various camps within two days after the earthquake. However, the replacement of heavy equipment and transmission lines is in progress and would be completed by June 2008. For reconstruction of damaged facilities, procurement of necessary equipments (high and low voltage lines, transformers, grid station equipment, tools and vehicles) is being made to restore supply of power to pre-earthquake level. Funding for power sector is committed by the Asian Development Bank (ADB) and the Japan Bank for International Cooperation (JBIC). The Reconstruction and Rehabilitation cost has been provided in the following table:

Reconstruction and Rehabilitation Cost of Power System (PESCO)		
S.No.	Item Description	Cost (Million Rs.)
1	132KV Grid Station/Transmission Line Equipment	4.000
2	Sub Stations Buildings (Non Residential)	1.220
3	Sub Stations Buildings (Residential)	0.000
4	PESCO Buildings (Non Residential)	0.000
5	PESCO Buildings (Residential)	0.000
6	H.T and L.T Structures	1.440
7	Accessories for H.T/L.T Lines	1.500
8	H.T and L.T Conductors	3.760
9	Distribution Transformers	3.900
10	Sub-services & Bulk Supply Connections	0.600
11	Meters for Connections	0.581
12	Testing Equipments & Line T&P	2.000
13	Installations Charges	3.720
Total		22.721

3.8 Transport Sector*

i. Extent of Damage:

A total of 85 km of roads and 44 bridges, which were declared as partially damaged in the earthquake in different parts of the district, are presented in the following table:

Extent of Damages to Road Sector and Scope of Work																
Sector	W&S				TMA Puran				TMA Alpurai				Total			
	PD		New		PD		New		PD		New		PD		New	
Roads	Km	No.	Km	No.	Km	No.	Km	No.	Km	No.	Km	No.	Km	No.	Km	No.
Road	247	25	31	3	155	26	0		172.5	34	0		74.5	85	31	3
Bridges	0			2		28	0			16	0			44		2

Source: Work and Services TMAs Alpurai & Puran, District Shangla 2006

ii. Reconstruction plan

To reconstruct the damaged as well as new roads and bridges, a three years financial plan has been prepared with an estimated cost of Rs 1376.416 million. Total 605.5 km of roads, including 46 bridges will be constructed. Year-wise details are given in the following table:

Year-Wise Proposed Budget for Transport Sector			
Year	Estimated Cost in Rs. Million	Unit	
		Road km	Bridges
2006-07	764.01	320.5	31
2007-08	520.006	254	13
2008-09	92.4	31	2
Total	1376.416	605.5	46

* There is a change in the Road Sector Reconstruction Plan which is not reflected here.

ii Reconstruction plan

This sector will be reconstructed with a cost of Rs 50.41 million in which Rs 46.26 million has been allocated for 6 completely damaged units in the year 2006-07 and Rs 4.415 million has been allocated for 7 partially damaged units in the year 2007-08. The details are given below:

Year-Wise Proposed Budget of Forest Sector		
Year	Estimated Cost in Rs Million	Unit
2006-07	46.26	16
2007-08	4.415	7
Total	50.41	23

Source: Forest Department District Shangla

3.10 Social Protection Sector

i. Extent of Damages

The earthquake of October 2005 damaged some of the infrastructure of existing govt. departments at Shangla. The Social Welfare Department is currently operating its activities in rented building. However, the department was also affected in terms of services. District Shangla has no building for the social welfare department, mother and child home, Kashana for girls, Darulaman for women, residential centre for elderly people and rehabilitation centers to support the affected people. Therefore, it is required to focus on this sector and prepare some important infrastructure to provide support to vulnerable people of the district.

ii Reconstruction Plan

The Social Welfare Department has now proposed following schemes for inclusion in the reconstruction activities for 2007-08.

Names of Projects for 2007-08 (Social Protection)
Strengthening of District Social Welfare office
Construction of District Social Welfare Complex Shangla including following centers:
a) Construction of Mother & Children Home.
b) Construction of Kashana (For Orphan Girls with education, boarding and lodging).
c) Construction of Rehabilitation centre (Residential).
1- People with special needs (Disabled)
2- Children (Orphan, Abandoned, Caring, Abused etc. with education, boarding and lodging).
